1 Introduction

A. User Manual Use Case:

This user manual is provided to help all members of the IIT Kanpur campus community get the most out of LoreDrop. Although LoreDrop has been designed with simplicity and accessibility in mind, this guide provides step-by-step instructions for every feature — from account creation to event creation and administration — ensuring that even first-time users can navigate the platform confidently.

B. Project Aim:

LoreDrop is a campus-wide event discovery and management platform built exclusively for IIT Kanpur. Its mission is to ensure that no student, faculty member, or staff misses a campus event — whether it is a technical fest, cultural performance, club meeting, or sports event.

By providing a structured, real-time feed of events published by verified organizers, LoreDrop bridges the gap between event organisers and the campus community. It goes beyond notice boards and WhatsApp announcements by offering:

A personalised event feed tailored to each user's interests and subscriptions.

Search and filter tools so users can find events by keyword, category, or organisation.

Engagement features — upvotes, comments, and saved events — so students can interact with events and plan ahead.

A verified organiser workflow so only authorised representatives of councils, clubs, and organisations can publish events.

An admin moderation layer to maintain the quality and integrity of content on the platform

C. Intended Audience:

User Type	Description
Students	Browse events, upvote, comment, save to calendar, and follow organisations to receive personalised notifications.
Organizers	Verified representatives of councils, clubs, or organisations who can create, publish, edit, and manage event posts on behalf of their organisation.
Admins	Platform administrators who approve organiser access requests, moderate content, and ensure the integrity of the event feed.

2 Software Requirements

This application needs a web browser such as Google Chrome, Microsoft Edge, and similar software for it to run. The software and its dependencies may require an operating system that runs on a 64-bit architecture.

LoreDrop is a web-based application and requires no installation. The following are the minimum requirements to access the platform:

Requirement	Details
Web Browser	Google Chrome (recommended), Mozilla Firefox, Microsoft Edge, or any modern browser supporting ES Modules.
Internet Connection	Required for all features including authentication, feed loading, and notifications.
IITK Email Address	An active @iitk.ac.in email address is required to register and access the platform. Access is restricted to the IITK campus community.
Operating System	Any OS supporting a 64-bit web browser (Windows, macOS, Linux).
No Installation	LoreDrop is entirely browser-based. No app or plugin installation is required.

3 Definitions

1. User:

Any authenticated member of the IITK campus who has registered on LoreDrop using a valid @iitk.ac.in email address.

2. Admin:

A verified user who has been granted access to manage events for one or more organisations (councils, clubs, or bodies).

3. Event Feed:

The platform super-administrator who can approve or reject organiser access requests and moderate event content.

4. Event Card:

A compact preview of an event displayed in the feed, showing the title, organising body, date, venue, tags, upvote count, and comment count.

5. Upvote:

A single-click interaction indicating interest in an event. Each user may upvote an event once; clicking again removes the upvote.

6. Comment:

A text message posted by a user under a specific event's detail view.

7. Save to Calendar

A bookmark action that adds an event to the user's personal saved-events calendar page (/calendar).

8. Organisation:

A campus body (council, club, or festival committee) whose events are displayed on LoreDrop. Examples: Students' Gymkhana, Performing Arts Council, Robotics Club.

9. OTP:

One-Time Password. A 6-digit numeric code sent to a user's IITK email address to verify their identity during sign-up or login.

10. Notification Centre:

A formal request submitted by a user to be granted organiser privileges for a specific organisation. Requires admin approval.

11. Draft:

An event post that has been saved but not yet published. Only visible to the creating organizer.

12. RBAC:

Role-Based Access Control. The system LoreDrop uses to restrict features based on a user's role (Student, Organizer, or Admin).

4 Functionality

A. Register / Login

LoreDrop uses OTP-based email verification to ensure that only verified IITK community members can access the platform. There is no separate username/password registration — your IITK email address is your identity.

Step 1 — Opening the Platform

- Open your web browser and navigate to the LoreDrop URL.
- You will be greeted by the LoreDrop landing page, which showcases platform statistics and features.
- Click the Sign In button in the top-right corner to proceed to the authentication page.

Step 2 — Entering Your IITK Email

- D. On the authentication page, enter your full IITK email address (e.g., yourname23@iitk.ac.in) in the Email field.
- E. Click the Verify Email / Send OTP button.
- F. The system will check whether your email is a valid @iitk.ac.in address and send a 6-digit verification code to your inbox.

The image shows a mobile app interface for IITK Email Verification. At the top, there is a purple envelope icon. Below it, the title "IITK Email Verification" is displayed in bold black text. Under the title, the instruction "Enter the verification code" is shown in a smaller font. The form contains three main sections: 1. Email field: A light blue rounded rectangle with a purple envelope icon and the text "Email:" followed by the email address "mukunds23@iitk.ac.in". 2. Verification Code field: A white rounded rectangle with the text "Verification Code" and "Enter the 6-digit code we sent to mukunds23@iitk.ac.in". Below this text is a white input field with a light gray border and the placeholder text "000000". 3. Action buttons: Three stacked buttons at the bottom. The top button is purple with the text "Verify Code". The middle button is light gray with the text "Resend Code". The bottom button is light gray with the text "Change Email".

Note: Only @iitk.ac.in email addresses are accepted. Attempts to register with external email providers will be rejected.

Step 3 — Entering the OTP

- G. Check your IITK email inbox for a message from LoreDrop containing a 6-digit verification code.
- H. Enter the code in the Verification Code field on the OTP page.
- I. Click Verify Code to confirm your identity.

Step 4 — Outcomes

- J. Correct OTP — First-time user: Your account is created automatically, and you are redirected to the Event Feed.
- K. Correct OTP — Returning user: You are logged in and redirected to the Event Feed.
- L. Incorrect OTP: An error message is displayed. You may re-enter the code or click Resend Code to receive a new OTP.
- M. gSend Failed / Network Error: A message is shown. Check your internet connection and try again.

Note: OTP codes expire after a short period. If you have not received the code within 2 minutes, click Resend Code.

Step 5 — Logging Out

- N. Click your profile avatar in the top-right corner of any page.
- O. Select Logout from the dropdown menu.
- P. You will be redirected to the landing page

B. Navigating the Home / Feed Page

The Event Feed (/feed) is the primary interface of LoreDrop. It displays a chronological, scrollable list of events from all verified organisations on campus. Here is a guide to every element on the page.

Header Navigation Bar

Element	Function
LoreDrop Logo	Click to return to the main Event Feed from any page.
Search Bar (centre)	Type keywords to search for events by title, description, tags, or organisation name.
Theme Toggle (moon icon)	Switch between light and dark display modes. The preference is saved across sessions.
Notification Bell	Opens the Notification sidebar showing new events and admin status updates. A red badge indicates unread notifications.
Profile Avatar	Opens a dropdown with My Profile, Create Event, Request Organisation Access, and Logout options.

Left Sidebar — Organisation Navigation

1. For You: The default tab showing all events from all organisations.
2. Councils: Lists all campus councils (e.g., Fine Arts and Photography, Performing Arts Council, Students' Gymkhana). Click any council to filter the feed to events from that council only.
3. Festivals: Lists major campus festivals (e.g., Techkriti, Thomso). Click to filter the feed.
4. Clubs: Lists all registered clubs (e.g., Robotics Club). Click to filter the feed.

Main Feed Area

5. Each Event Card shows: organising body name, event title, short description, date and time, venue, mode (Online / Offline), target audience (UG, PG, PhD, Faculty, Everyone), tags, upvote count, comment count, save (bookmark) icon, and share icon.
6. Click anywhere on an Event Card to expand it and see full event details, media, and the comment section.
7. Click Register if an external registration link is available for the event.

Right Sidebar — Upcoming Events

8. Shows a mini calendar of the next 5 upcoming events across all organisations, sorted by date.
9. Click any upcoming event to jump to its card in the main feed.

C. Searching and Filtering Events

LoreDrop provides multiple ways to find specific events. All filters work simultaneously, allowing you to combine search terms and filter criteria for precise results.

1. Search by Keyword

Step 1: Click the search bar at the top centre of the Feed page.

Step 2: Type any keyword related to the event — for example, the event name, description text, a tag (e.g. "technology"), or an organisation name (e.g. "Gymkhana").

Step 3: The feed updates automatically as you type. Only events matching your keyword in any searchable field will be shown.

Step 4: Clear the search bar to return to the full unfiltered feed.

2. Filter by Organisation

Step 1: In the left sidebar, click on any Council, Festival, or Club name.

Step 2: The main feed will instantly filter to show only events published by that organisation.

Step 3: Click For You in the sidebar to remove the filter and show all events again.

3. Filter via the Filter Button

Step 1: Click the Filters button (funnel icon) at the top-right of the feed area.

Step 2: A filter panel will open. You can filter by: date range (start and end date), event mode (Online / Offline), target audience, and tags.

Step 3: Apply your selections. The feed updates immediately.

Step 4: Click Reset Filters to clear all active filters.

Note: All three filter types — keyword search, organisation filter, and the Filters panel — operate simultaneously. For example, you can search for 'expo' and filter by Techkriti at the same time.

D. Viewing Event Details

Each Event Card in the feed can be expanded to show the complete event information, media, and community interactions.

How to View Full Event Details

Step 1: In the Event Feed, click on any Event Card.

Step 2: The card expands inline (or opens a detail view) showing the complete event details.

Information Available in the Event Detail View

Field	Description
Organising Body	The council, festival, or club that published the event.
Event Title	Full name of the event.
Description	Complete description of the event, its purpose, and agenda.
Date & Time	Start date, start time, and end time of the event.
Venue	Physical location or online meeting link.
Mode	Online or Offline.
Target Audience	Who the event is open to: UG, PG, PhD, Faculty, or Everyone.
Capacity	Maximum number of attendees (if specified by the organizer).
Tags	Keyword tags for the event (e.g., technology, expo, innovation).
Event Image / Poster	Uploaded media for the event, if provided.
Registration Link	External registration URL (if applicable). Opens in a new tab.
Upvote Count	Total number of upvotes from all users.
Comment Count	Total number of comments.
Comments Section	All comments posted by users, with timestamps.

E. Saving Events to Calendar

You can bookmark any event to save it to your personal calendar page for easy reference later.

How to Save an Event

Step 1: Find the event you want to save in the Event Feed.

Step 2: Click the bookmark icon on the Event Card (or in the expanded event detail view). The icon turns

filled/highlighted to confirm the event has been saved.

Step 3: To unsave the event, click the bookmark icon again. It will return to its outline state.

Accessing Your Saved Events — The Calendar Page

Step 1: Click the calendar icon in the navigation bar, or navigate to /calendar.

Step 2: The Calendar page loads all events you have saved, displayed as cards in chronological order.

Step 3: Each saved event card shows the event title, date, time, and venue.

Step 4: From a saved event card you can: click the bookmark icon to unsave the event, click the upvote icon to upvote the event, click the comment icon to go to the event's comment section, or click Add to Google Calendar to create a Google Calendar event for this item.

Note: If you have no saved events, the page will display a 'No saved events' message and an Explore Events button to return to the feed.

F. Upvoting and Commenting on Events

Upvoting an Event

Upvotes indicate your interest in an event and help surface popular events on the feed.

Step 1: Locate the event in the feed or the calendar page.

Step 2: Click the upvote (arrow or heart) icon on the Event Card. The count increases by 1 and the icon changes colour to confirm your upvote.

Step 3: To remove your upvote, click the icon again. The count decreases by 1.

Note: You must be logged in to upvote. Attempting to upvote while not authenticated will show a 'Please sign in' toast notification.

Commenting on an Event

Step 1: Click on an Event Card to expand the detail view.

Step 2: Scroll down to the Comments section.

Step 3: Type your message in the comment input field.

Step 4: Click Post Comment (or press Enter). Your comment appears immediately in the thread with your display name and a timestamp.

G. Managing Your Profile

Viewing Your Profile

Step 1: Click your profile avatar in the top-right corner.

Step 2: Select My Profile from the dropdown.

Step 3: Your profile page shows: your display name, IITK email, roll number, branch, member since date, and activity summary (saved events count, upvoted events count, comments count).

Step 4: The bottom of the page lists your Saved Events.

Editing Your Profile

Step 1: On the Profile page, click the Edit Profile button.

Step 2: Update any of the following fields: Display Name, Full Name, Roll Number, Branch.

Step 3: Click Save Changes to confirm, or Cancel to discard.

Step 4: Your profile page will reflect the updated information immediately.

Note: Your email address cannot be changed after registration as it is tied to your IITK identity.

The screenshot shows a mobile application interface for editing a user profile. At the top left, there is a back arrow and the text "Back to Feed". Below this is a profile card. On the left side of the card is a circular profile picture with a purple-to-pink gradient and a white letter 'S'. To the right of the picture are four input fields: "Display Name" (containing "sdhruv23"), "Full Name" (with placeholder text "Enter your full name"), "Roll Number" (with placeholder text "Enter your roll number"), and "Branch" (with placeholder text "Select your branch"). At the bottom of the card are two buttons: a blue "Save Changes" button with a floppy disk icon and a white "Cancel" button with a red 'X' icon.

H. Notification Centre

The Notification Centre keeps you informed about new events from organisations you follow and the status of your admin-related requests.

Opening the Notification Centre

- Step 1:** Click the bell icon in the top-right navigation bar.
- Step 2:** A sidebar panel opens, showing your most recent notifications.
- Step 3:** A red badge on the bell icon shows the number of unread notifications.

Types of Notifications

Notification Type	When It Appears
New Event	When a new event is published by an organisation you follow. Shows the event name and the organisation.
Organisation Request Approved	When the admin approves your request for organiser access to an organisation.
Organisation Request Rejected	When the admin rejects your request for organiser access.
Access Request Received (Admin only)	When a user submits a new access request for an organisation you administer.

Note: Notifications are polled every 10 seconds. There is no need to refresh the page.

I. Requesting Organisation Access

If you are an authorised representative of a campus council, club, or organisation, you can request organiser access through LoreDrop. Once approved by the admin, you will be able to create and manage events for your organisation.

How to Request Access

Step 1: Click your profile avatar in the top-right corner of the Feed page.

Step 2: Select Request Organisation Access from the dropdown menu.

Step 3: A dialog box opens. Select your organisation from the dropdown list (e.g., Students' Gymkhana, Robotics Club, etc.).

Step 4: Click Send Request. A confirmation toast notification will confirm that your request has been sent.

Step 5: Wait for the admin to review your request. You will receive a notification in the Notification Centre when a decision is made.

After Approval

10. Once approved, your account is upgraded to an Organizer role for the selected organisation.
11. The Create Event option will become available in your profile dropdown.
12. You can manage events for your organisation through the Organisation Admin Dashboard.

If Rejected

13. You will receive a rejection notification in the Notification Centre.
14. You may re-submit a request if you believe there was an error, or contact the platform admin directly.

J. Creating and Managing Events (Organizer Only)

This section is only applicable to verified Organizers. If you do not have organiser access, refer to Section I to request it.

Accessing the Organisation Admin Dashboard

Step 1: Click your profile avatar in the top-right corner.

Step 2: Select Create Event from the dropdown. This opens the Organisation Admin Dashboard (/admin).

Step 3: The left panel shows all organisations you have organiser access to. Click the organisation you want to manage.

The screenshot displays the 'Organization Admin' dashboard. At the top left, there is a link to 'Back to Feed'. The main heading is 'Organization Admin' with a subtitle 'Manage your organization and create events'. On the left, under 'Organizations', there is a list of organizations, with 'Chess Club' highlighted. The main area is titled '+ Create New Event' with the instruction 'Add a new event to your organization's feed'. The form includes fields for 'Event Title' (with a placeholder 'e.g., Campus Tech Meetup'), 'Description' (with a placeholder 'Describe your event...'), 'Event Image' (with a 'Choose File' button and a note 'You can upload from device or paste an image URL below.' and a placeholder 'https://example.com/image.jpg'), 'Tags (comma-separated)' (with a placeholder 'e.g., tech, conference, networking'), 'Location' (with a placeholder 'e.g., Building A, Room 101'), and 'Capacity' (with a placeholder 'e.g., 100').

Creating a New Event

Step 1: In the Organisation Admin Dashboard, ensure the correct organisation is selected in the left panel.

Step 2: Fill in the Create New Event form with the following details:

- Event Title: A clear, descriptive name for the event.
- Description: Full description of the event, its agenda, and purpose.
- Event Image URL: A publicly accessible image URL for the event poster (optional).
- Tags: Comma-separated keywords (e.g., technology, expo, innovation).
- Location: Physical venue or online meeting URL.
- Capacity: Maximum number of attendees (optional).
- Target Audience: Select from Everyone, UG, PG, PhD, or Faculty.
- Start Date & Time: Use the date/time picker.
- End Date & Time: Use the date/time picker.
- Mode: Online or Offline.
- Registration Link: External URL if attendees need to register separately (optional).

Step 3: Click Create Event to publish the event immediately to the feed.

Note: Ensure all required fields are completed before submitting. Missing required fields will trigger a validation error highlighting the incomplete fields.

Viewing Your Organisation's Events

15. After selecting an organisation in the left panel, the dashboard shows all events published by that organisation.
16. Each event shows its title, date, and current status (published/draft).

Editing or Cancelling an Event

17. Locate the event in the organisation's event list.
18. Click Edit to modify any event details. Update the fields and click Save Changes.
19. To cancel an event, click Cancel Event. This marks the event as cancelled and notifies users who have saved or upvoted it.

K. Admin Dashboard (Admin Only)

This section is only applicable to the platform Administrator. The Admin Dashboard provides tools to manage organiser access requests and moderate event content.

Accessing the Admin Dashboard

Step 1: Log in with your admin-privileged IITK email account.

Step 2: Click your profile avatar in the top-right corner.

Step 3: Select Admin Dashboard from the dropdown. This opens the Admin Dashboard (/admin).

Reviewing Pending Access Requests

Step 1: The Admin Dashboard displays a list of all Pending Access Requests in the main panel.

Step 2: Each request shows: the requester's name and email, the organisation they are requesting access to, and the date of the request.

Step 3: To approve a request: click the Approve button next to the request. The user is immediately granted Organiser access for that organisation and receives a notification.

Step 4: To reject a request: click the Reject button. The user receives a rejection notification.

Note: When no pending requests are present, the dashboard shows 'No pending requests'.

Admin Privileges Summary

Privilege	Description
Approve Organisr Access	Grant a user organiser privileges for a specified organisation.
Reject Organisr Access	Deny a user's request; they may re-apply.
View All Pending Requests	See a consolidated list of all pending access requests across all organisations.
All Organizer Privileges	The admin also inherits all organizer capabilities and can create events for any organisation.
